DETAILED ACTION

1. This office action is in response to the application 10618135 filed on 7/11/2003.

Claims 58,59,63,64,68, and 69 are pending.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 58,63,68 recite the limitation "said request to modify said new file" in lines 8,9 and 13 respectively. There is insufficient antecedent basis for this limitation in the claim. Each claim reads "said request to modify said new file, however the only request to modify in the claim is the request to modify a current file. It appears and examiner will assume for the purposes of examination that lines 8,9, and 13 were meant to read said request to modify said current file.

Claim Rejections - 35 USC § 102

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000.

Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

Claims 58,59,63,64, 68,69 are rejected under 35 U.S.C. 102(e) as being anticipated by US 6553391 (hereinafter Goldring)(Art of record).

As for claim 58, Goldring discloses: receiving a request to modify said current file (See column 5 lines 2-4); creating a new file wherein said new file is a replica of said current file and wherein said new file is associated with a file descriptor (See column 5 lines 7-9); modifying said new tile in response to said request to modify said current file (See column lines 12-14), wherein said new file is only accessible by an entity that sent said request to modify said current file (See column 6 lines 60-65); and linking said file descriptor to said file name, such that said new tile replaces said current file (See column 3 lines 61-63 and column 6 lines 15-19).

As for claim 59 Goldring discloses: wherein, prior to linking said file descriptor to said file name, said current file continues to be capable of being accessed (See column 6 lines 15-19 note: old version is still accessible until the reference is changed).

Claims 63 and 64 are apparatus claims corresponding to the method claims 58 and 59 respectively and are thus rejected for the same reasons set forth in the rejection of claims 58 and 59.

Art Unit: 2166

Claims 68 and 69 are computer readable method claims corresponding to the method claims 58 and 59 respectively and are thus rejected for the same reasons set forth in the rejection of claims 58 and 59.
